

STAINLESS STEEL TANKS

About Wila

Wila develops and manufactures technical solutions for the food and beverage industry. We are well known for our solutions, all of which have been developed for specific cases and requirements. We always apply best practice and advanced expertise, and our standards are very high. Our strength is to enter into partnerships with our customers to ensure the most unique, innovative and optimum solutions.

We are experts in the field of membrane housings, tubular heat exchangers, tanks and complete units. We supply these products for major parts of the food industry, and we develop solutions for some of the most advanced lines of business. We use state-of-the-art techniques and technologies in our production and are at the cutting edge of innovation and new thinking in terms of the market as well as in terms of our knowledge of products. We live up to these things because we have some great facilities at our disposal, and we can match your technical and quality-related requirements when it comes to hygiene and production safety.

Ready to work with your production line

We have the facilities, the know-how and the quality assurance systems to develop and manufacture stainless steel products, equipment's and plants that meet your requirements. And we have the right people to handle the job for you from its implementation to the finished delivery.

Our series of products and components have been tested and are ready to be incorporated into your production. We will be pleased to assist you with your specifications, adjustments and project design.

Tanks

At Wila, we have a fully equipped and modern workshop for handling and production of various types of tanks with a capacity of maximum 30 m³.

We produce a wide range of tanks for several industries within the food sector, which is why we acknowledge and live up to the importance of hygienic designs and quality.

Our construction department has a strong relationship with our customers, which ensure that our solutions match the needs and expectations of every single customer. Everything is carried out in Inventor with 3D solutions so that each facility can overview the production.

We develop tanks with different kinds of equipment such as heating mantles, insulating sheaths, and agitators (several types). The tanks can be positioned both horizontally and vertically.

We even produce special tanks such as pipe holding cells for pasteurization facilities. Read more about the different tanks we produce on our website www.wila.dk

Wila's capabilities

Wila's design and engineering services range from complete projects to assisting our customers in achieving their goals. In the last 20 plus years we have been successful in working closely with food manufacturers and leading suppliers of process equipment for the very demanding food industry, which has resulted in highly competitive quality products and solutions with added value for our customers. Our extensive in-house expertise includes innovative manufacturing processes and design deeply rooted in solid engineering.

If you involve us early on in your process, we will act as a focused, innovative and solution-oriented sounding board for your ideas. Through a systematic and analytical approach, we will make a value-adding contribution to your project.
